Download 123 Rummy APK for Android

Rummy comes first in this new app, which pairs a ₹100 bonus and 60+ games with live chat, Telegram and WhatsApp help.

18+ only. Real-money games carry financial risk. Read the legal notice at the end of this page.

123 Rummy is one of the youngest apps we track: it surfaced in November 2026, and we added it to our list on 17 November. The name tells you what comes first: rummy is the first of eight game tiles on its "Join in 123Rummy!" landing page, ahead of Teen Patti, Texas Poker, Domino, Ludo and three quick betting games, and a bar above the download button reads "Get 100 Bonus".

Read on for the safe way to get the genuine 123 Rummy APK , what that ₹100 bonus asks of you before it becomes cash, how deposits and ₹100 withdrawals work, and why an app this new calls for caution with your first deposit.

Name, Spelling and What the Page Promises

The app writes its name as one word, 123Rummy, while the logo and share image spell it "123 RUMMY". Some people search for "rummy 123" instead; all three point to the same app.

Under a "Why Players Choose" heading, the official page shows four icons: Cashback Offers, 24*7 Customer Support, 100% Secure&Legal and "6 Core+" Users. Its page description adds slots, Aviator, a daily mystery bonus and a claim to be "India's leading online gaming platform". These are the app's own words, and the safety section below weighs them.

Spotting the Genuine Download Page

Generic words like "123" and "rummy" bring up download pages that have nothing to do with this app. Check three details first:

- Logo: a large orange and gold "123" under a gold crown with a red jewel, "RUMMY" in green letters on a white plate, and a dark green card-table background with a diamond pattern.
- Page title: the browser tab reads "Join in 123Rummy!", and a "Get 100 Bonus" bar stays fixed at the bottom of the dark green page.
- Address: the official page sits at www.123rummy00.com, and 123rummy1.com shows exactly the same page.

Walk away from any site that shows a different logo, gives the file its own "version" number or asks for a fee.

123 Rummy APK Download Steps

The 123 Rummy download is an Android APK. The official page mentions no Play Store listing and no iPhone app, so treat any iOS "123 Rummy app" with suspicion.

- Tap our Download button at the top. It opens the official page in your phone's browser, such as Chrome.
- Give the page a few seconds. A short waiting animation plays while it fetches the file link, then the real download button takes its place.
- Tap that button and let the APK finish saving.
- Open the file from your notifications or the Downloads folder. If Android blocks it, allow "Install unknown apps" for your browser (the menu path differs between phones) and open the file again.
- Check that the name and icon on the install screen match 123 Rummy, then tap Install.
- Open the app and register.

Our link carries a referral code, and the official page passes that code along with the download. So take the file from that page, not from an APK someone forwards on WhatsApp. For "App not installed" or a parsing error, our guide to APK install errors goes through each message, and the Yono APK download guide covers the unknown apps setting.

Your Account and the 100 Referral Coins

You register inside the app. Use your own mobile number and enter your name exactly as it appears on your bank or UPI account, since payouts usually go only to a matching name. Keep to one account per person and per phone; duplicate accounts often lose their bonuses.

When someone shares a 123 Rummy referral link, WhatsApp previews it with the line "Enter my referral code and get 100 coins!". The code travels inside that link and is passed on with the download, so install from the link you were given; a code may not be accepted after signup. If the app keeps logging you out or a verification code never arrives, see our fixes for login trouble .

123 Rummy Bonus: What ₹100 Really Means

The bar at the bottom of the official page says "Get 100 Bonus", and our details table lists it as a ₹100 bonus. Treat it as bonus money, not cash. It carries a play-through (wagering) target: you must bet a set total before the bonus, or what you win with it, can be withdrawn. The app sets that target, so read the bonus screen before you play.

A ₹100 headline rarely turns into ₹100 you can withdraw. It tends to last longest on low-stake rummy tables, where your choices count. Our bonus guide shows what a play-through target leaves you with.

Rummy Basics Before You Sit Down

Rummy is the first tile on the official page, but the page does not say which formats the app runs. Open the rummy lobby and check whether it offers Points, Pool or Deals tables, plus the entry amount and table rules, before you join one.

Indian rummy usually deals 13 cards to each player from one or two decks with jokers. In general terms:

- Sequence: three or more cards of one suit in running order, such as the 5, 6 and 7 of hearts.
- Pure sequence: a sequence with no joker. A valid hand needs at least one, plus a second sequence that may use a joker.
- Set: three or four cards of equal rank, each from a different suit, such as three queens.
- Declaring: when all 13 cards sit in valid groups, you discard your extra card and declare. A wrong declaration costs penalty points, so check every group first.

In Points games one deal decides the result, Pool games knock out players who pass a points limit until one remains, and Deals games run for a fixed number of hands. Our rummy rules guide has worked examples. Skill helps, but the deal still matters, so start at the lowest stakes, set a spending limit before your first table and stop when you reach it.

Teen Patti, Aviator and the Rest of the Lobby

The page claims 60+ games. These are the ones it names:

- Teen Patti: three-card Indian poker, where betting choices matter but the cards decide most hands.
- Texas Poker: two private cards and five shared ones, with reading opponents part of the game.
- Domino and Ludo: slower turn-based games where planning helps, though tiles and dice still swing results.
- Dragon & Tiger and Andar Bahar: card bets settled in seconds by pure chance. Our guide to Dragon vs Tiger and Andar Bahar sets out the odds.
- 7 Up Down: a bet on two dice totalling below seven, exactly seven or above it.
- Slots and Aviator: random results; in Aviator you cash out before a rising multiplier crashes.

No pattern, timing trick or "predictor" app changes the outcome of these quick games, as our hacks and tricks guide explains.

123 Rummy Withdrawal and Deposit Basics

Deposits are made inside the app, and the payment screen lists the options available at the time. Withdrawals start at ₹100, though the withdrawal screen always shows the current minimum.

A few habits prevent most payout delays:

- Clear any bonus play-through first, because bonus balance cannot be cashed out.
- Use a bank account or UPI ID registered in your own profile name.
- Ask for a small first withdrawal, such as ₹100, to see how long it takes.
- Save the order ID of every request. If one is still pending after 24 hours, share that ID with live chat, plus a screenshot.

Never deposit money you would miss. Our withdrawal guide explains each payout status.

Support: Live Chat, Telegram and WhatsApp

A small panel on the right edge of the official page links three channels:

- Live chat: opens a chat window on www.123rummyhelp.com.
- Telegram: a folder link that adds a bundle of official channels in one tap.
- WhatsApp: a WhatsApp channel. Channels are one-way, so you can read posts but not message the team there.

The page lists no phone number, no email and no Facebook, Instagram or YouTube accounts. Any "123 Rummy helpline number" in a comment or search snippet does not come from the app, and no genuine agent needs your OTP or UPI PIN. Our customer care guide shows how fake helplines operate.

Download, Referral and Payout Problems

Should the app stop opening for good, our article on Yono apps that stop opening or shut down explains what you can still do about a balance.

Is 123 Rummy Real, Safe and Legal?

123 Rummy is a real app in one sense: it has a live official page with an APK download and linked support channels. Whether it deserves your money is another question. The app is new, shows no licence or independent audit, and has no withdrawal history anyone can check yet. Read its claims with care:

The legal position matters more than any badge. India's Promotion and Regulation of Online Gaming Act, 2025 bans online money games, and the rules that put it into effect started on 1 May 2026. Offering or advertising such games is now an offence, banks can block payments to them, and if an app stops paying, players have no licence, regulator or compensation scheme to turn to. - Rummy comes first among 60+ games, by the official page's count
- ₹100 bonus on the official page, plus cashback and referral coins
- Live chat, a Telegram folder and a WhatsApp channel
- A ₹100 withdrawal minimum makes a first test payout easy
- New in November 2026, with no payout track record yet
- Android APK only; no Play Store listing or iPhone app is mentioned
- Bonus money carries a play-through target before any cash out
- Indian law (the 2025 Act) bans real-money play

Final Word on 123 Rummy

123 Rummy gives rummy players a familiar setup: rummy tables up front, quick card and dice games behind them, a ₹100 bonus and three ways to reach support. What it lacks is a record. Until players have cashed out over several weeks, treat the 123 Rummy app as unproven: download it through the official page alone,

deposit a small amount and request a ₹100 withdrawal early. More rummy apps are on our rummy apps list , and recent arrivals appear on the new Yono games list.

What You Need to Play 123 Rummy

Check your phone before you download the 123 Rummy APK. These are general recommendations for Yono apps, not official figures from 123 Rummy.

123 Rummy FAQs (Frequently Asked Questions & Answers)

The official page offers a ₹100 bonus ("Get 100 Bonus"), and the referral share text promises 100 coins to anyone who joins with a friend's code. Treat both as bonus balance rather than cash: the ₹100 comes with a play-through target set by the app, and the bonus screen shows whether the coins are a separate reward.

₹100 is the listed minimum, though the withdrawal screen always has the current figure. If a request stays pending for over a day, check the bonus play-through and account name, then send the order ID to live chat.

Live chat is the direct route: the chat button on the official page opens it on www.123rummyhelp.com. The official Telegram folder and WhatsApp channel are the other two links. No phone number or email is listed, so treat any "helpline number" shared online as a scam.

It exists: the official page is live, it offers an APK download and it links a live chat. It is also new in November 2026, without an Indian licence or any payout history, so install it from the official page and test a ₹100 withdrawal before adding more money.

Its cash games are not. The Promotion and Regulation of Online Gaming Act, 2025 bans online money games, including rummy for cash, and the Act's rules have been in force since 1 May 2026. Nobody licenses or regulates these apps, and no scheme pays players back if one stops paying.

- Important Legal Notice

India's Promotion and Regulation of Online Gaming Act, 2025 bans offering, advertising and processing payments for all online money games. Its rules came into force on 1 May 2026, and some states restricted these games even earlier. Check the law that applies to you before you download or deposit. Read our legal guide .

What Players Say About 123 Rummy

See why players choose 123 Rummy through real experiences from our growing community.

I start with the game list. 123 Rummy highlights Ludo and lists 60+ games in the lobby, so I would check the exact table and rules before choosing a game.

On 123 Rummy, the page lists ₹100 bonus. I would read the eligibility, play-through and withdrawal conditions before treating the bonus as usable balance.

For cash-out planning, 123 Rummy lists a ₹100 minimum withdrawal and support through Live chat, Telegram, WhatsApp. I would confirm KYC and processing details before adding funds.
