Lobby shape

567 Slots does not pretend to be a sportsbook. The first screen is a reel wall grouped by volatility tags: low, mixed, and high. A 567 badge sits on featured titles, which is branding, not a published RTP sheet. Scroll far enough and a thin live-game sidebar appears with one crash title and one roulette table.

What the ₹77 credit actually does

New accounts see a ₹77 spin pack after OTP. The pack is wagering-locked to slots only in the copy we captured. Live games and any card tables were excluded from the meter. Expiry was listed as seven days on the bonus history row, not on the welcome banner.

Spin feel and session tools

Autoplay stops on a bonus round, which is useful. There is no built-in loss cap on the spin panel itself — you have to leave the game to find deposit limits. Sound defaults to on, and the green-gold theme is bright enough that a night session feels louder than it is.

Money out

₹100 is the lowest cashout printed next to UPI and PhonePe. The cashier warns that bonus balance and cash balance are separate rows. If the spin pack is still active, the withdraw button greys out until the meter completes or the bonus expires. That is the main trap for first-week users.

Fair-play claims

The help page mentions an RNG certificate without naming the lab on the same screen. Game rules open inside each title rather than in a central RTP index. Treat that as incomplete disclosure until you screenshot the certificate PDF yourself.

Device notes

At 44 MB the build is heavier than colour-prediction apps in this batch. On a mid-range Android handset the reel wall stuttered once after a long autoplay, then recovered. Keep background downloads off if you are on a weak network.

Verdict line

Use 567 Slots if you want a dedicated reel lobby and can live with a tiny live-game side dish. Do not install it expecting cricket markets or rummy clubs. Confirm the ₹77 wagering lock and a ₹100 cash test before you scale stakes.
