What Is Boss Rummy?

Boss Rummy is an Android card-game app built around rummy. The central challenge is arranging cards into valid sequences and sets while deciding what to draw, keep and discard. Knowing the scoring and declaration rules helps turn those decisions into a clear plan for the hand.

Preparing for a Rummy Hand

Begin by sorting cards into possible sequences and sets. In common 13-card rummy, work towards a pure sequence early and avoid holding isolated high-value cards for too long. Reconsider the plan after each draw instead of waiting indefinitely for a single missing card.
