Diwa Win: another high Diwa ceiling

Snapshot: rolling Latest, 34 MB , up to â‚¹777 , floor â‚¹100 , publisher label DIWA GAMES. Win in the name is branding – it does not describe odds or withdrawal speed.

Near-twins on this site: Diwa Top (also â‚¹777-class on our snapshot, 33 MB) and Diwa Wow (â‚¹677-class, 45 MB). Use size + publisher label + offer screenshot to tell files apart when icons match.

Checks

Package not install-confirmed. Rolling build. Prefer hosts you can name; refuse accessibility grabs. Read wagering before treating â‚¹777 as cash. Re-check: 28 Oct 2026. 18+ only.

Diwa Win pages on peer hubs often cycle the same bonus banner. Here we keep the angle on table clarity: how fast the lobby shows stakes, whether Points and Pool sit side by side, and how withdraw status is phrased after a small cash-out. That is the checklist we refresh when the APK mirror changes.

If you already use another Diwa label, treat Win as a twin lobby with its own APK channel – install only one cash client unless you know why you need two. Size and version fields above are listing snapshots, not a lab certificate.

What the Diwa Win numbers can tell you

The advertised ceiling on Diwa Win is â‚¹777. The listed withdrawal floor is â‚¹100, about 13% of that ceiling. Reaching the floor is not the same as being able to withdraw the headline amount.

The listed file is 34 MB, 8 MB smaller than the Yono Clubs median of 42 MB.

The version line says Latest, with no build number. Two files can both be called Diwa Win and still not be the same build.

One of the three directories we compare has a page for this name. A second page quoting the same size and the same â‚¹777 is the cross-check this listing does not have.

Figures come from public listing snapshots we re-check. They are advertisements, not a payout we watched.

What we noticed in the listing

- Format: chance-based or club-style lobby (quick rounds, so a budget helps)
- Listed on 1 of 3 reference directories we compare
- No fixed build number published, so a file cannot be matched to a release

Worth knowing

- Trusting Win as a payout SLA.
- OTP sharing.

Details that would help

- A second independent directory listing the same package name and size
- A fixed version number tied to a release date
