The Holy Rummy listing opens with a 4.3-star rating and 292K+ downloads, which makes the rest of the card easy to read in one pass. Filed under Best Rummy Picks, the app carries a Rs.41 signup credit on the welcome side and a ₹100 minimum on the withdrawal side, and those two figures belong in separate conversations. The payment list, meanwhile, names UPI and wallet, and no other channel appears on the card.

## What does Holy Rummy offer at signup?

The welcome offer is the Rs.41 credit that lands when you create an account. Nothing in the listing ties that amount to anything beyond signup, so treat it as a promo figure rather than a general balance. The cash side is its own matter: withdrawals start at ₹100, which is the floor the card states for taking money out. Payment methods are limited to the two named on the card, UPI and wallet, and no additional options are listed.

## Cashing out with Holy Rummy

The ₹100 payout floor is the number to keep in mind after you start playing, because it defines the smallest cashout the card records. The 38 MB build at v4.1.7, last refreshed in Dec 2025, tells you the app is kept current, and the 18+ age gate is stated in the same tone as the rest of the listing. None of this changes the rating, and the rating does not change any of it, so the card stays internally consistent from top to bottom.

Take the listing numbers as a starting point, not a verdict. See Blog , Privacy , Terms .

The Holy Rummy entry records a Rs.41 signup bonus for new players and a ₹100 minimum withdrawal. The two figures stay in their own contexts on the page: Rs.41 belongs to the welcome offer, while ₹100 is the smallest payout amount listed. The directory also records 292K+ downloads and a 4.3 rating for the app.

The Holy Rummy listing names UPI and wallet as its payment methods. Both terms appear on the page in that form, and no other channel is listed for the app. The record therefore shows only UPI and wallet for moving money, alongside the ₹100 minimum withdrawal floor.

Holy Rummy is recorded at version v4.1.7 with an update date of Dec 2025. The APK build is 38 MB, and the listing links it as a direct download for Android. The entry also carries an 18+ age limit and a 4.3 rating from its recorded base.

The listing links a direct APK for Android, so there is no store page involved. The file is 38 MB at version v4.1.7, updated in Dec 2025. Installing means sideloading: the device must permit installs from unknown sources, and players should confirm the file at the operator's destination before running it.
