What a new Jungle Haan account receives

Jungle Haan is a Slots & BET Games title whose card records a 4.4-star rating and roughly 164K+ installs. The APK itself comes in at 38 MB, the build is v3.2.2, and the refresh stamp reads Jan 2026. New players who sign up meet a Rs.51 welcome credit, a figure that belongs to the sign-up context only and does not extend to later deposits. On the payout side, the listing puts the minimum withdrawal at ₹100—the floor you must clear before a cash-out request qualifies. The source writes the bonus as Rs.51 and the floor as ₹100; both spellings are reproduced here exactly.

The payment rails named on the card are UPI and Bank transfer, with no other methods listed, so money is meant to move through those two channels. The age gate is 18+, applying from account creation rather than the first wager. Because the entry is short on game-mode detail, this description sticks to what the card actually says.

For someone deciding whether to install, the practical reading is simple: the entry cost is modest, the download is light at 38 MB, and the client sits at v3.2.2 with a January 2026 refresh behind it. None of those figures guarantee performance, but they do suggest a maintained project. If the Rs.51 join credit draws you in, remember that the ₹100 withdrawal floor governs how soon winnings can come out. Keep the build updated after installing, and treat every bonus as a promotional figure subject to the app's own terms. Nothing on this page promises winnings; it is a summary of the listing and nothing more.

The Rs.51 figure on the Jungle Haan listing is recorded as a join offer, so it belongs to the joining side of the entry rather than the cash-out side. The withdrawal side is separate: the listing sets the minimum payout at ₹100. Keep the two roles distinct when comparing—one rewards registering, the other is the floor for taking money out. Both amounts are exactly what the listing displays, and the operator's current terms can differ.

The Jungle Haan entry names exactly two payment methods: UPI and Bank transfer. No cards, no wallets, and no other services appear on the page, so those two rails are all the listing advertises for deposits and withdrawals. If you rely on a different method, check the operator's destination—the directory only reflects what the listing shows and does not operate the app itself.

The Jungle Haan entry records version v3.2.2 at 38 MB, with a refresh date of Jan 2026. Because the listing links a direct Android APK, the build you download could be newer than the page version, so it is worth comparing after installation. The listing also records 164K+ installs, a 4.4 rating, and an 18+ age limit.

Jungle Haan records 164K+ installs on the listing, alongside a 4.4-star rating. That install figure is what the page shows at the time of writing—it grows as more people install the APK. The entry also lists the app under Slots & BET Games, carries an 18+ age limit, and offers a Rs.51 join offer, so the install count is just one of several figures on the page.
