Dedicated to providing players with a classic 13-card Rummy experience

- Version 13.5 69MB

What is Rummy 101 APK

Rummy 101 is a digital gaming platform that has recently emerged in India's online rummy market, specialising in providing players with a classic 13-card rummy experience. Compared to many established platforms, Rummy 101 focuses on a clean, streamlined interface and low barriers to entry, attracting a large number of novice players seeking a relaxed competitive experience.

The platform supports a variety of game modes, including Point Rummy, 101 Pool Rummy, 201 Pool Rummy and Contract Rummy, catering to players of varying skill levels. Following the Indian Supreme Court's ruling that Rummy is a game of skill, Rummy 101 is legally permitted to operate in most Indian states. The platform utilises a certified random number generator (RNG) to ensure fair card dealing and is backed by a 24/7 customer support team.

App Features

- Support for multiple game modes : The platform offers three mainstream variants—Points and Rummy (fast-paced rounds), 101/201 Pool Rummy (knockout style) and Contract Rummy (fixed rounds)—allowing players to choose flexibly according to their schedule
- Beginner-friendly features : The platform provides free practice tables, enabling new users to fully familiarise themselves with the rules and gameplay before betting real money. The game interface is designed to be simple and intuitive, with highly recognisable cards, minimising the risk of accidental mistakes.
- Anti-cheating system : The platform has implemented an anti-collusion detection system to prevent coordinated cheating across multiple accounts, ensuring that every game is a true test of players' skills.
- Regular tournaments : Free and cash tournaments are held weekly, with prize pools ranging from ₹5,000 to ₹50,000, providing players with additional opportunities to win cash.

How to download and install Rummy 101

- Download the installation package : Click the 'Download Rummy 101 APK' button at the top of the page to download the latest version of the installation package. We recommend downloading via Wi-Fi to save mobile data.

- Authorise installation : Once the download is complete, tap the APK file. If the system prompts 'Installation of apps from unknown sources is prohibited', please go to your phone's 'Settings' → 'Security' and enable 'Allow installation from this source' (the path may vary slightly depending on your phone model).
- Complete the installation : Follow the on-screen prompts and tap "Install". Wait a few seconds for the process to finish. Once installed, the app icon will appear on your home screen.
- Launch for the first time : Tap the icon to open the app, grant the necessary permissions (such as storage access to save game data), and you will be taken to the registration screen.

How to log in to Rummy 101

- Open the Rummy 101 app and tap the 'Log In' or 'Sign Up' button.
- Enter your mobile number and tap 'Send OTP'.
- Enter the verification code you received via text message into the app to complete the login process—no need to remember a password, making it quick and easy.
- Once logged in, we recommend that you complete your KYC verification (submit your Aadhaar card, link your UPI ID and bank account) as soon as possible to ensure smooth withdrawals later on.

Rummy 101 Withdrawal Rules

Once Rummy 101 users have completed KYC verification, they may request a withdrawal. The minimum withdrawal amount is ₹100, which is relatively low compared to similar platforms and is particularly favourable for players with smaller balances. Please note that only funds won through gameplay can be withdrawn; bonus balances issued by the platform can only be used to continue playing and cannot be withdrawn directly, although funds won whilst playing with these bonuses can be withdrawn as normal.

Withdrawal requests are typically processed within 30 minutes to 2 hours. In the event of bank system maintenance or public holidays, processing may take up to 24 hours. Should a withdrawal fail, the funds will be returned to the game wallet within 24 hours.

Join 1000,000 Indian players and earn cash rewards every day!

Rummy 101 is an online multiplayer rummy platform where players compete against real users in real time, rather than playing against the computer. The platform offers a variety of game modes, including points-based, pool-style and contract-based games. Compared to traditional offline rummy, the advantages of the online platform include the ability to play at any time, a diverse range of opponents, and the opportunity to win real money.

In Rummy 101, each card has a fixed point value: Aces, Kings, Queens, Jacks and 10s are each worth 10 points; number cards are worth their face value; and Jokers are worth 0 points. At the end of the game, the total score of the cards not used in valid sequences or sets constitutes the player's score for that round; the

lower the score, the better. In both Point and Pattern modes, the winner claims a prize corresponding to the total points of their opponents.

n 101 Pool Rummy, each player pays a fixed entry fee to form the prize pool. Players accumulate points throughout each round; once a player's score reaches or exceeds 101 points, they are eliminated. The game continues until only one player remains, who wins the entire prize pool. The rules for 201 Pool Rummy are the same, but the score limit is raised to 201 points, and the game lasts longer.

Rummy 101 features a referral bonus scheme: when an existing user invites a new user to register and complete their first deposit via a dedicated invitation link or code, the referrer receives a bonus, typically 10%–20% of the invitee's first deposit, up to a maximum of ₹500. The invitee also receives an additional reward.

For beginners, we recommend: 1) prioritising the completion of pure runs, as this is a prerequisite for a valid declaration; 2) using Jokers judiciously, aiming to complete non-pure runs or sets rather than pure runs; 3) observing opponents' discarded cards to deduce the composition of their hands; 4) avoiding holding too many high-value cards (such as A, K, Q, J) to prevent excessive losses should an opponent make a declaration; 5) starting at free practice tables and only participating in cash games once you are familiar with the rules.

Under India's current legal framework, rummy has been classified by the Supreme Court as a 'game of skill' rather than 'gambling', and is therefore legal in most Indian states. However, some states have imposed bans on online rummy and poker. Similar bans are in place in Andhra Pradesh, Telangana, Odisha, Assam and other states. All games are restricted to persons aged 18 and over. Please gamble responsibly and within your means.
