Leaving this site opens a third-party route—reconfirm licensing, domains, and eligibility before you proceed.

The starting point

Ludo Zee frames ludo as a match of small decisions under a dice: which token to move, when to chase, and when to park on safety while the numbers come in.

Whoever you are in this for, the app treats the entry decision as the important one: everything on the main screen exists to make that comparison easier.

Play, step by step

Turns are timed, so the pace of a match is steady. The main skill is token selection under uncertainty — the dice decides the number, you decide which piece carries it.

Stakes and entry costs appear on the same card as the join button, which removes most of the guesswork from choosing.

The essentials, in list form:

- Exact-count entry to the home column
- Room stakes listed before joining
- Timed turns to keep matches moving
- Marked safe squares

Moving around the app

Help content is embedded: each format links its own explanation, and a general help section covers account and payment questions.

Session habits that help

After a strong round and a weak one alike, the useful move is the same: check the history, confirm what happened, and decide whether the session continues on its original terms.

Access and security

Where the app offers notification preferences, they include transaction alerts — worth leaving on, since they surface money movements you would want to know about.

Setup, in short

Installation is the usual Android path: use the DOWNLOAD control, open the file once it finishes, and allow the install when prompted. The listed build is version 1.8.0 at approximately 42 MB; leave a little extra storage for app data.

Before you claim

The ₹40 welcome bonus applies to eligible newcomers. What ‘eligible’ means — account status, activation method, game restrictions, expiry — is defined in the promotion terms, which precede the claim button. Bonus credit is a separate balance and does not count toward a withdrawal until its own conditions are met.

Payment routes and limits

The app processes withdrawals above ₹250 through UPI and IMPS. Any charges attached to a route are displayed with the request, and each payout is subject to account verification. Arrival is method-dependent; the app deliberately does not promise fixed turnaround times.

- Page note

How this review fits the flow

Glance the hero, read the story, skim FAQs, then decide if the outbound brand still matches how you like to play on mobile.

This route is editorial context only—we never table balances or issue installs.

Common questions

The app gathers ludo boards where dice rolls, token moves and home-column races decide the result behind one interface, with settings and help kept to a single menu. Adults who want a plain, readable layout are the intended audience.

You can cash out once your withdrawable balance reaches ₹250. The payout screens show the amount, destination and any fees for confirmation before the request is filed.

Rules sit one tap from each game: open the entry, read the card, then decide. For anything unfamiliar, that read is the cheapest preparation available.

On registration, accounts that meet the conditions can receive a ₹40 welcome bonus. The terms are the authority on activation and expiry, and the credit itself is bonus balance rather than cash.

Stake levels vary by format and are posted with each one. The screens show the amount being committed each time, so costs are explicit rather than accumulated silently.
