Review this rummy app's key details, including offers, payout terms, payment options, and download information, before visiting the operator's official website.

Leaving this site opens a third-party route—reconfirm licensing, domains, and eligibility before you proceed.

Bare product

Mulu Win is almost only a colour cycle and a wallet. The lime-gold wordmark is the entire brand kit: 16 MB, UPI only, no sports, no cards, no slots. After OTP you land on a single countdown tile. That honesty of scope is useful — you will not discover a hidden rummy club later — but it also means there is nowhere to hide if the cycle feels off.

Rs.25

Rs.25 after OTP looks generous until you see 15x wagering on a 30-second colour loop. Combined with an ₹80 cashout floor, you would need a clean run just to unlock a tiny exit. Mathematically this bonus is a trap for anyone who treats the headline as cash. Skip it and fund a test amount you can afford to lose in two or three rounds.

Cycle UI

Red / green / violet with a countdown. History is a strip of 20 results with no hash, no lab, and no provider name. You are betting a timer. The UI does not pause between rounds unless you leave the screen, which is how people chain stakes without meaning to. Force a break by closing the tile, not by staring at the last twenty colours.

Cashier

UPI alone. ₹80 floor is low, which is the only friendly number on the sheet. Failed deposits did not always reverse in-app until restart, so keep your UPI app's own history as the source of truth. There is no saved beneficiary until after the first successful payout, which adds taps when you are already impatient.

Support

A Telegram-style link in settings is not the same as in-app tickets. Moving dispute screenshots into a random chat gives away UID and UPI handles. If that is the only help path, size the account as disposable and do not store a large float overnight.

Why list it

This import batch includes thin .win brands so you can compare them with fuller casinos. Listing is not endorsement. A 180K install band plus 15x on Rs.25 is enough reason to stay on cash or stay out. Use it only as a control sample against QQ Win or Rs9, which at least expose more rails or a mission sheet.

Close

If you still test Mulu Win, use cash only, one small UPI in, one ₹80 out, then stop. Do not grind colour to finish Rs.25. The product is too small to justify a second deposit if the first cashout stutters.
