The app in brief

OK Rummy gathers its rummy content into a single lobby, so the choice of format, table size and stake happens before any cards are dealt.

Whoever you are in this for, the app treats the entry decision as the important one: everything on the main screen exists to make that comparison easier.

From entry to result

Choose a table whose stake and format you already understand. The deal itself is standard rummy — thirteen cards, jokers as wildcards, one card drawn and one thrown each turn — and the result is settled by hand validity at declaration.

At a glance:

- Rebuy and leave options at defined breaks
- Deadwood count on the result screen
- Auto-grouping that can be corrected manually

Account basics

Security is mostly hygiene: a unique password, no shared logins, and attention to any sign-in notice the app raises. None of it is exotic, and all of it protects the balance.

The quick-start path

Tap DOWNLOAD, install the result, and the app is ready in its 2.6.2 build (32 MB). Registration, where needed, happens in-app on first launch.

Screens and menus

The settings worth knowing before a session are sound, notifications, and display preferences; all three sit together in the account menu.

Features you will notice first:

- Favourites row for repeat formats
- Catalogue grouped by format family
- Back gesture returns to the same list position

Pause and review

A comfortable session has three fixed points: a spend ceiling, a time ceiling, and an exit that you choose rather than the balance choosing for you.

Before you claim

The ₹40 welcome bonus applies to eligible newcomers. What ‘eligible’ means — account status, activation method, game restrictions, expiry — is defined in the promotion terms, which precede the claim button. Bonus credit is a separate balance and does not count toward a withdrawal until its own conditions are met.

What to expect from a payout

The payout floor is ₹200, via UPI and IMPS. A request moves through the selected route after the standard account review; charges, if any, are displayed before you confirm. No specific completion time is promised, so plan around the method you choose.

How this review fits the flow

Glance the hero, read the story, skim FAQs, then decide if the outbound brand still matches how you like to play on mobile.

This route is editorial context only—we never table balances or issue installs.

Common questions

It is digital rummy with deals, pool and points formats listed side by side, collected in a single Android app with the account, payment and settings screens arranged around it. Reading a rules page before the first round is the recommended opener.

Outcomes follow the stated rules and chance; they are not predictable and not owed. If play stops being affordable entertainment, that is the point to stop.

On registration, accounts that meet the conditions can receive a ₹40 welcome bonus. The terms are the authority on activation and expiry, and the credit itself is bonus balance rather than cash.

You can cash out once your withdrawable balance reaches ₹200. The payout screens show the amount, destination and any fees for confirmation before the request is filed.

One account per person is the rule. Multiple accounts complicate verification and can block withdrawals, so there is nothing to gain and much to lose.
