Latest Promo Code

The five rummy coupons working in June 2026 , ranked by headline value. Every one was re-verified against its app's live deposit screen on 8 June, all are first-deposit offers, and each works on its own platform only:

Claiming any of them is the same 60-second routine: install the matching app, register with your mobile number, open Add Cash , enter the coupon before paying, confirm the bonus preview, deposit via UPI or Paytm. That's it — the bonus lands in your locked balance and unlocks as you play. Payment-wise, all five apps take UPI and Paytm with instant crediting; on the way out, withdrawal speeds range from Rummy 365's instant-to-30-minutes to RummyCircle's up-to-48-hours, so factor that in if getting money back quickly matters to you.

And if a coupon isn't actually what you're after, the quick map of adjacent freebies:

One ranking caveat worth ten seconds of your attention: the table above sorts by headline value. Sorted by money a casual player will actually withdraw , the order roughly flips — A23's and Junglee's big ceilings release at ~2% instalments, while Rummy 365's modest ₹500 releases at ~10% and is realistically yours within a normal month of play. The full promo code roundup runs that maths properly if you want it.

A one-line note on each coupon, for the scan-and-go reader:

- A23FIRST — biggest ceiling in Indian rummy, paid out in instalments as you play; A23 (formerly Ace2Three) has run since 2006 and takes withdrawals from just ₹50.
- JRWELCOME — the richest match rate at 250%; deposit ₹2,100 for the full ₹5,250. Slowest release of the five.

- RBWELCOME — RummyBaazi doubles up to ₹4,000 and backs it with the busiest ongoing promo calendar for existing players.
- RC2000 — RummyCircle's clean 100% doubler; 40M+ players and TDS handled on winnings.
- RB365MAX — flat ₹500 over the standard welcome bonus; smallest number, fastest route to withdrawable cash.

Terms That Actually Matter

The compressed version — five rules that cover all five coupons:

- First deposit only. Any prior deposit on that app, however small, voids the coupon. One welcome coupon per person, per platform (PAN-matched).
- Enter before paying. No app applies coupons retroactively. No preview on screen = no bonus, full stop.
- Bonuses arrive locked. They convert to withdrawable cash via cash-game wagering. Tournament buy-ins mostly don't count.
- Bonuses expire. Validity runs 30–90 days by app. Whatever you haven't released is deleted.
- Minimums apply. RB365MAX needs ₹1,000+; the match coupons hit their ceilings at ₹2,000–₹2,100 deposits.

If a coupon rejects, the usual culprits are a previous deposit, a trailing space from your keyboard, or a rotated campaign — each app's Add Cash offer carousel always shows the currently valid replacement. And deposit only what you'd comfortably spend on entertainment: responsible gaming beats every coupon.

If the Code Doesn't Work

Quick triage, in order: confirm you've never deposited on the app before; retype the coupon in uppercase with no spaces; check your deposit meets the minimum; then look at the deposit screen's offers carousel for the live replacement code. Still nothing? Most apps auto-apply a baseline welcome offer with no coupon at all — you lose only the upgrade. And since each coupon is platform-locked, one rejection never has to cost you a welcome bonus entirely: four other apps in the table will still take a first deposit from you, so switching beats fighting a dead code.

For app-specific troubleshooting (where the field hides, KYC quirks, release schedules), use the deep dives: Junglee Rummy promo code , RummyCircle promo code and A23 Rummy promo code .

A final filter for coupons you find elsewhere: if a "rummy coupon" comes from a Telegram forward, a YouTube description or a coupon-aggregator site rather than this kind of tested list or the app itself, assume it's dead or bait. Real coupons validate on the app's own deposit screen with a visible bonus preview; fake ones are usually attached to links pushing modified APKs. Stick to official installs and codes the app itself confirms on screen.

Alternatives Worth Comparing

This page is deliberately the short version. Where to go for more:

- Full comparison with release-rate maths → rummy promo code (master roundup of all five offers)
- Coupon types explained — deposit vs cashback vs bonus codes, and where apps hide personalised coupons in the promotions tab, email and SMS → rummy coupon codes
- Today's live status → rummy promo code today
- No-deposit free credits (₹25–₹51 just for signing up, no coupon needed) → rummy free bonus

If you just want a recommendation: A23FIRST suits high-volume grinders who can chew through a ₹10,000 ceiling — A23 is India's oldest rummy brand (since 2006) with a low ₹50 minimum withdrawal; our A23 Rummy review covers its instalment schedule honestly. Casual players get more real value from Rummy 365 — faster release, instant–30 min UPI payouts, and a ₹50 no-deposit credit on top; see the Rummy 365 review or go straight to the Rummy 365 APK download.

How to Use the Code

Each coupon works on its own app only, and only on your first deposit there — so pick the app before you pick the coupon.

Sign up with your mobile number and OTP. Skip any code field at registration; rummy coupons are deposit-screen codes.

Choose your amount, paste the coupon into the coupon code field and apply. The bonus preview must appear before you pay.

Pay via UPI or Paytm. The coupon bonus lands locked and converts to cash as you play — check the wallet for your release progress and expiry date.

Biggest ceiling: A23FIRST (up to ₹10,000). Richest match: JRWELCOME (250%). Easiest to actually cash out: RB365MAX on Rummy 365, thanks to its ~10% release rate. Pick by how much you play, not by headline.

No — every coupon here requires a deposit, and the bonus arrives locked until you've played enough cash games. The only no-deposit option is a signup credit like Rummy 365's ₹50 free.

Install the matching app, register, open Add Cash, enter the coupon before paying, and confirm the bonus preview. Coupons can't be applied after a deposit completes.

All five are new-user, first-deposit coupons. Existing players should check their app's promotions tab and email for personalised reload and cashback coupons instead.
