Our Rummy Pride audit opens on community tables and social proof widgets. Community widgets show active tables — social proof does not verify payout speed. Card fields below are a timestamped decode — not an operator promise.

## Deposit method notes

Payment stack during our review: typical rails include UPI and cards. Minimum deposit to activate Rs.31 may differ from the ₹250 withdrawal mention — they are not always linked.

## KYC timing

Identity checks may trigger before the first withdrawal rather than at signup. For Rummy Pride , finish KYC early if you plan to test a ₹250 cashout — delays often come from document review, not UPI rails.

## Support channel reality

In-app chat bots often quote template answers about Rs.31 and ₹250 . Escalate to human support for wagering disputes — bots rarely parse screenshot evidence.

## Install trace status

Outbound install URLs rotate. If our button opens the audit modal, the latest trace failed — not a score penalty. Email [email protected] with the app name for trace status.

## Cashout map

Support macros and FAQ answers sometimes disagree on floors. If you see ₹250 in one place and ₹500 elsewhere, trust the in-app withdrawal form at the moment you cash out.

For Rummy Pride , note whether UPI payouts require a prior card deposit — some operators gate first withdrawal by method.
