> Download the official Rummy Wealth APK — v11.2.0, 47 MB, Android 6.0+. High-stakes tables, VIP cashback, ₹41 free signup credit. Install guide and FAQ.

The high-roller's rummy client — the biggest APK on our tracker at 47 MB, verified v11.2.0 file details, and what the VIP cashback ladder actually pays serious-volume players.

App Overview

Most rummy apps are engineered for the ₹10-a-point crowd. Rummy Wealth aims higher: its lobby gives serious real estate to mid- and high-stakes Points tables, its tournament schedule features bigger buy-ins than any direct-APK rival we track, and its retention hook — the VIP cashback programme — is built to reward exactly the players who put real volume through cash tables. Climb the tiers and your weekly cashback percentage rises, withdrawal processing accelerates, and dedicated support shortcuts open up. It is, unapologetically, an app for regulars with bankrolls.

That focus shows in the software. The 47 MB APK — the largest in our tracker — carries high-resolution tables, detailed card animations and a stats dashboard that tracks your win rate by format and stake. Versioning is at v11.2.0, which hints at the development pace: this app updates frequently and the polish reflects it. It earned a 4.3 rating in our testing, with the standout scores coming on app stability and game variety at stakes other apps simply don’t host.

What does the VIP ladder actually feel like in practice? New accounts start at the base tier, where cashback is token. Consistent play moves you up monthly — each tier raising the cashback percentage on rake paid, trimming withdrawal review times, and at the upper levels assigning a relationship manager reachable through in-app chat. The clever part of the design is that tiers are assessed on rolling volume, not lifetime totals, so lapsed regulars slide back down. That keeps the perks genuinely exclusive but also creates a treadmill worth being honest with yourself about: the programme is engineered to make skipping a week feel expensive.

Standard credentials are all present: 13-card Points, Pool and Deals, UPI and Paytm withdrawals from a ₹100 minimum clearing in instant-to-2-hours, a ₹41 free signup credit and a welcome offer up to ₹1,100. The full tier-by-tier cashback table, withdrawal speed logs and our reservations about table selection at the very top stakes are in the complete Rummy Wealth review .

APK Requirements & Compatibility

Current release: v11.2.0 , May 2026. The download is 47 MB and requires Android 6.0 or newer .

Be honest with yourself about hardware here. “Minimum Android 6.0” is the floor, not the experience. On our 2 GB RAM test device the app installed and ran, but lobby scrolling stuttered and the stats dashboard loaded slowly; on a 4 GB mid-ranger it was flawless. If your phone is entry-level, a lighter client from our APK

download hub will serve you better day to day — the 37 MB Rummy Win APK offers a related cashback concept in a much smaller package.

Practicalities: clear 250 MB of storage before installing, download the full 47 MB on Wi-Fi where possible, and if you see “App not installed,” delete the partial file and start the download over. Large APKs fail mid-transfer more often than small ones — it’s the most common support complaint for this app.

Connection quality deserves a specific mention for this app. High-stakes Points hands resolve in under two minutes, and a dropped connection mid-hand at ₹250-a-point costs real money — Rummy Wealth does auto-rejoin you and the table waits briefly, but the timer doesn’t pause forever. If your daily play happens on patchy mobile data, that’s a stronger argument against high-stakes tables than any spec on this page. The app includes a connection-strength indicator in the table header; treat anything below three bars as a reason to sit out the big tables and play lower stakes until you’re back on solid signal.

Safety Checklist

An app marketed at high-stakes players attracts proportionally nastier fakes. Hold the line on these rules:

- Official source, no exceptions. This page’s link or Rummy Wealth’s own website. “VIP version” APKs floating around Telegram are scams trading on the brand’s high-roller image.
- 47 MB exactly. The genuine v11.2.0 weighs 47 MB. A 20 MB “lite” or 60 MB “premium unlocked” copy is a repack — and at the deposit sizes this app handles, a compromised install is catastrophic.
- Audit permissions at install. Network, storage and notifications are legitimate. SMS, contacts, call logs or accessibility access means OTP-stealing malware — abort.
- Mods are mathematically impossible. Shuffling and dealing happen server-side. Any APK claiming to reveal opponents’ cards or boost VIP tiers exists solely to drain the larger-than-average wallets its victims carry.

Given the stakes involved, add one more layer: enable app-level biometric lock in Rummy Wealth’s settings after installing, and never store screenshots of your KYC documents in your gallery.

Two further habits for anyone keeping a four-figure balance in this app. Withdraw on a schedule rather than letting winnings accumulate — a rummy wallet is not a bank account, carries no deposit insurance, and the instant-to-2-hour UPI pipeline means there’s no convenience argument for parking money in it. And do your KYC inside the app only: a persistent phishing pattern targets Rummy Wealth players with emails claiming their “VIP verification” is incomplete, linking to credential-harvesting copies of the KYC form. The app never requests documents by email.

Honest Take Before You Install

Rummy Wealth’s welcome package is deliberately unremarkable — ₹41 free and up to ₹1,100 matched is mid-table at best, and if maximum signup value is your goal, our best rummy bonuses comparison lists several apps that pay multiples of that on day one. This app back-loads its value instead: the VIP cashback only becomes meaningful once you’re putting consistent weekly volume through cash tables at ₹100+ stakes.

A quick self-test before you commit the storage space:

So the question isn't "is this a good app" — it demonstrably is, with the most stable high-stakes tables and one of the faster withdrawal pipelines we've tested. The question is whether you're its player. Casual and low-stakes players will pay heavyweight storage and hardware costs for a cashback ladder they'll never climb; a smaller bankroll gets a better deal almost anywhere else, including premium-feel alternatives like Taj Rummy with its ₹25 minimum withdrawal.

And a hard truth that matters more here than on any other page we publish: high stakes mean high variance. Cashback cushions losses; it does not prevent them, and a bad week at ₹500-a-point tables is a serious amount of money. This is an 18+ product — set a strict monthly deposit cap inside the app before your first high-stakes session, and read our responsible gaming guide first. The players who do well on Rummy Wealth treat it like a discipline, not a rush.

How to Install the APK

Tap the download button above and let the file finish completely — at 47 MB it's the largest rummy APK we cover, and an interrupted transfer is the top cause of failed installs. Use Chrome or your default browser only.

Android prompts you on opening the file: go to Settings → Install unknown apps and allow your browser. Every direct-download app requires this single approval.

Tap Install and give it a moment — the larger v11.2.0 package takes closer to 30 seconds, plus a longer first launch while the high-resolution table assets unpack.

Return to Settings → Install unknown apps and revoke the browser's permission. On an app where real money moves at high stakes, this small habit matters even more.

Sign up with mobile number and OTP for the ₹41 no-deposit credit, then complete KYC early — Rummy Wealth's VIP tiers and higher-stakes tables unlock faster on fully verified accounts.

Yes — the genuine v11.2.0 build is 47 MB and requests only network, storage and notification permissions. Because the app targets bigger bankrolls, fake versions are common bait; verify the size, reject anything wanting SMS or contacts access, and never sideload 'VIP unlocked' mods, which are pure malware.

India's Play Store carries only a small approved roster of real-money gaming apps. Rummy Wealth distributes its Android client legally as a direct APK from its official site, as nearly every rummy operator does. Normal practice for the category.

₹41 free on signup with no deposit, then a welcome offer worth up to ₹1,100 on the first deposit. The headline numbers are average — the app's real economics live in the VIP cashback programme, which pays regulars a recurring percentage based on play volume.

Android 6.0 or newer, around 250 MB of free storage, and ideally 3 GB+ of RAM — at 47 MB this is the heaviest client we track, and it's tuned for mid-range and flagship phones. Entry-level devices will run it but feel it. No iOS app exists.

The app announces new versions in-app and downloads the replacement APK itself. Always install over the existing copy — uninstalling first can orphan pending VIP cashback. Your balance, tier status and KYC carry through every update.
