What you are opening

Each rummy deal in Rummy World starts from the same place — a shuffled shoe, a sorted hand and a discard pile that slowly reveals what the table is holding.

Everything below assumes the same starting posture: read first, set your limits, then play.

What decides a round

A rummy round here runs on two moves per turn — draw, then discard. The skill sits in which of the two you take from, and in noticing what the pile has already given away. Jokers can stand in for missing cards, but a pure sequence cannot use one, so the first job of any hand is finding that natural run.

Where a format has house details — tie-breaks, timeouts, side rules — they are printed with the format, not discovered later.

Worth knowing before the first round:

- Chip or point balance shown beside the table
- Deadwood count on the result screen

- Rebuy and leave options at defined breaks

Who can hold an account

Under-18 accounts are not permitted, and adults should keep both the app and its payment methods out of reach of minors.

From download to first round

Installation is the usual Android path: use the DOWNLOAD control, open the file once it finishes, and allow the install when prompted. The listed build is version 2.6.6 at approximately 26 MB; leave a little extra storage for app data.

Quick reference:

- Review the account details on file
- Choose a format and stake within your plan
- Set sound and notification preferences

Staying level

Automatic-play settings, where formats offer them, should carry the same limits you would apply by hand — session caps included. Convenience should not widen exposure.

Screens and menus

Help content is embedded: each format links its own explanation, and a general help section covers account and payment questions.

How the welcome bonus works

Newly registered accounts that pass the eligibility check can be credited a ₹75 welcome bonus. The associated terms specify activation steps, game eligibility and the use-by date. The credit lands in a bonus balance, distinct from the withdrawable total.

Withdrawal basics

To cash out, your withdrawable balance must be at least ₹500. Payouts travel by UPI and Net Banking. The request summary presents fees and destination details for confirmation, and completion time depends on the route chosen and the app's review — it is quoted as an estimate, never a guarantee.

- Page note

How this review fits the flow

Glance the hero, read the story, skim FAQs, then decide if the outbound brand still matches how you like to play on mobile.

This route is editorial context only—we never table balances or issue installs.

Common questions

Before installing, note the listing details: version 2.6.6, size about 26 MB, and a little extra space for data. The DOWNLOAD control starts the fetch.

A ₹75 welcome bonus is available under the promotion's eligibility rules. The conditions are displayed with the offer; the credited amount sits in a bonus balance, distinct from your cash balance.

A payout needs a withdrawable balance of at least ₹500 and verified account details. The request summary presents everything — amount, route, charges — before submission.

Outcomes follow the stated rules and chance; they are not predictable and not owed. If play stops being affordable entertainment, that is the point to stop.

Installing it gives you a lobby organised around a rummy-first lobby in which table stakes, formats and seat availability are listed before you join, an account section, and payment routes for deposits and withdrawals. The Rummy grouping is where it sits in the wider catalogue.
