- Top Rummy: range bonus and Android 6.0+
- Why a range matters
- Device and size
- Vs Zip and King

Stored facts: version 1.0.02 , 69 MB , advertised â‚¹43 to â‚¹250 (a range, not a single credit), floor â‚¹100 , Android 6.0+ (stricter than many sibling rows on Android 5.0+). Covered on 2 of 3 reference directories.

Top in the title is marketing language on this desk – not an editorial ranking and not proof this build outranks Rummy Zip or Rummy King.

A range admits variability. Plan around the low end (â‚¹43-class) and whatever your offer screen actually credits. The â‚¹100 floor still gates cash-out math. Read how wagering works .

Android 6.0+ is a real device gate on older phones. 69 MB is heavier than many club APKs – useful as a mismatch check if a “Top Rummy” file arrives at 30 MB. Package not install-confirmed.

Rummy Zip pushes a high up-to ceiling at 51 MB. Rummy King is the heavy cash-style row with a Play collision warning. Top Rummy is the range-bonus / Android 6.0+ case. Re-check: 28 Oct 2026. 18+ only.

The listing names version 1.0.02. If the file you receive shows a different version on first launch, treat that as a different build of Top Rummy.

Two of the three directories we compare have a page for Top Rummy. They can still disagree on the bonus or the file size, so read both before treating either figure as settled.

Offer screens sometimes hide the wagering multiple. Copy that number from Top Rummy before you treat â‚¹250 as cash. How wagering works .

Figures come from public listing snapshots we re-check. They are advertisements, not a payout we watched.
